

OPERATING CONDITIONS

Altitude	: Not exceeding 1.000 meters
Ambient temperature	: -20°C~+40°C
Cooling method	: IC 411 (self external fan, surface cooling)
Duty	: Continuous (S1 duty)
Connection	: Y Star-connection for 3kw and below △Delta-connection for 4kw and above
Rated Voltage	: Standard stock available - 220V/380V and 380V/660V Other voltages can be supplied on request.
Rated Frequency	: 50HZ/60HZ
Insulation Class	: Class F
Protection Class	: IP55

TM-series motor is totally enclosed fan cooled (TEFC) basic series of general purpose low voltage three phase induction motor. This motor is built with compact structure, high efficiency, high torque, low vibration, low noise, and attractive design.

TM-series motor is broadly used as the driving equipment in various machineries such as pumps, blowers, compressors, crushing machineries, plastic extruding machineries, agriculture machineries, paper making machineries, milling machineries, mining machineries, and many others.

TM-series standard motor efficiency meets IE1 standard. IE2 and IE3 standard efficiency are available upon request.

TITAN
electric motor

TITAN ELECTRIC MOTOR is a high quality, efficient and reliable general purpose three phase induction motor. We support general industrial customers with small and medium size motor with output ranging from a few watts to hundreds of kilowatts.

TITAN motors are designed and manufactured according to IEC standard of output rating and mounting dimension in a facility that passed ISO 9001:2008 quality systems. Our products are CE certified.

TITAN motors are an excellent solution for general use machineries across various industries, including water treatment, mining, palm oil, textile, papermaking, food, construction, and many others.
